

EREN EVREN

ARCHITECTURAL DESIGNER

Corso Bolzano 2bis, 10121, TO || +39 327 906 7594 || eevren2001@gmail.com

I am an architect trained at Politecnico di Torino, currently completing an MSc in Architecture for Sustainability. My work gravitates toward adaptive reuse and urban regeneration, projects that negotiate between existing fabric, ecological systems, and new civic life. I approach design through concept, but I am drawn to the friction between idea and construction: how a proposal survives contact with material, regulation, and place. I am looking for a studio where early-stage design thinking and on-site reality can inform each other.

SKILLS

3+ Years of Experience

AutoCAD
ArchiCAD
Microsoft Office
Adobe Lightroom
Adobe Illustrator
Adobe Photoshop
Adobe InDesign

2+ Years of Experience

Rhino
Grasshopper
QGIS
D5 Render
AI Tools
Autodesk FORMA

0-1 Year of Experience

Autodesk Revit
Sketchup
CloudCompare
Prompt Engineering

EXPERIENCE

Architect | Servotel Corporation

November 2024 – May 2025 | Turin, Italy (remote)

At Servotel, I worked within an architectural consultancy advising development clients on site feasibility, massing strategies, and design selection, combining spatial and economic analysis up to LOD 300. I introduced AI-assisted workflows and tools such as Autodesk Forma to strengthen the team's site analysis capabilities. Projects included FIX Brewery in Thessaloniki and Markiz Patisserie in Istanbul.

Architectural Design Intern | Gresham Smith and Partners

August 2024 – October 2024 | Tampa, Florida

At Gresham Smith, I gained firsthand experience of a large-scale U.S. practice — working on the Sarasota Airport expansion with complex Revit workflows, on-site observation, and direct exposure to construction coordination. I also had the opportunity to explore 3D printing and Grasshopper as part of the team's design process.

Architectural Design Intern | DNA Architecture and Partners

August 2023 – October 2023 | Antalya, Türkiye

At DNA Architecture, my first professional experience, I contributed to small-scale residential and landscape projects, gaining foundational exposure to client coordination, regulatory compliance, and office workflows.

LANGUAGES

Turkish - Native
English - Advanced
